

Faisal Khan

Senior Angular & Frontend Engineer

+91 9340430696 | faisalsistec@gmail.com | Bhopal, Madhya Pradesh, India | linkedin.com/in/1123faisal | github.com/1123faisal | 1123faisal.github.io/portfolio

PROFESSIONAL SUMMARY

Senior Angular & Frontend Engineer with 7+ years of experience, the last 3 exclusively focused on Angular, NX monorepo architecture, and scalable component ecosystems. Proven ability to lead frontend teams, establish UI standards through Storybook-driven design systems, and deliver quality-first applications with strong test coverage. Early-career full-stack background provides a solid foundation for making informed architectural decisions across the stack.

CORE COMPETENCIES

Angular Architecture NX Monorepo Component Design Systems RxJS & NgRx Storybook
Cypress E2E Testing TypeScript Performance Optimization Technical Leadership Agile / Scrum
Code Review & Mentoring CI/CD

WORK EXPERIENCE

Taazaa Inc Noida, Uttar Pradesh
Senior Software Engineer March 2024 – Present

- Architected a scalable NX monorepo housing 6+ Angular micro-frontends, reducing build times by ~35% through optimized caching and affected-build strategies.
- Established a Storybook-driven component library adopted across 3 product teams, cutting UI inconsistency issues by ~50% in QA cycles.
- Introduced Cypress E2E test coverage from 0% to 70% on critical user flows, significantly reducing production regression incidents.
- Mentored 4 junior developers through weekly code reviews, pair-programming sessions, and internal tech talks; 2 were promoted within the year.
- Collaborated with product owners and designers to deliver 2 major feature releases on schedule using Agile/Scrum methodology.

WebMobril Technologies Pvt. Ltd.

Noida, Uttar Pradesh

Senior Web Developer

May 2022 – February 2024

- Architected and delivered Angular frontends for 3 client-facing applications serving 5,000+ active users, owning everything from component design to state management and routing.
- Built and maintained a shared Angular component library that standardized UI patterns across multiple projects, reducing duplication and speeding up feature delivery.
- Defined team-wide coding standards, Git branching strategies, and Angular style guides, reducing merge conflicts and code-review turnaround by ~30%.
- Onboarded and technically guided 3 junior developers with structured code reviews that measurably improved front-end code quality scores in SonarQube.

Benchwork Technologies

Noida, Uttar Pradesh

Full Stack Web Developer

March 2020 – April 2022

- Owned Angular frontend development for 4 web applications, building reusable component libraries and implementing complex UI workflows with TypeScript and SCSS.
- Redesigned a legacy dashboard's data-rendering logic, improving page-load performance by 45% and resolving critical client-reported UX bottlenecks.
- Implemented CI/CD pipelines via GitHub Actions and consumed REST APIs (payment gateways, SMS/email) with proper error handling and loading states.

Plebiscite IT Services

Noida, Uttar Pradesh

Angular Developer

October 2019 – February 2020

- Developed 5+ responsive, cross-browser UI modules in Angular with lazy-loading and route guards, improving initial load time by 20%.
- Translated Figma/XD designs into pixel-perfect components using TypeScript, HTML5, and SCSS, with consistent rendering across Chrome, Firefox, and Edge.

MSS Infotech

Noida, Uttar Pradesh

Web Developer

January 2019 – September 2019

- Built and maintained PHP/MySQL web applications; first professional role establishing foundations in structured coding, database design, and software delivery workflows.

TECHNICAL SKILLS

Angular & Core	Angular (v8–19), TypeScript, RxJS, NgRx, Angular Material, Lazy Loading, Route Guards, Reactive Forms
UI & Styling	HTML5, CSS3, SCSS, Tailwind CSS, Bootstrap, JavaScript (ES2022+)
Tooling & Quality	NX Monorepo, Storybook, Cypress, Git, GitHub Actions, Docker
Also Familiar	ReactJS, SvelteKit (<i>working knowledge</i>)
Earlier Stack	Node.js, Express.js, MongoDB, MySQL (<i>2019–2022</i>)

EDUCATION**Sagar Institute of Science & Technology**

Bhopal, Madhya Pradesh

Bachelor of Technology – Information Technology

2019

PROJECTS

ForSite — ForTec Medical

Taazaa Inc · Healthcare · USA

- Large-scale Angular 21 enterprise SPA (v2.2.29) for ForTec Medical — a US surgical technology provider mobilising 1,350+ devices across 12 surgical specialties nationwide for 35+ years.
- Serves dual audiences: internal operations (scheduling, billing, inventory, HR, work orders, sales) and a customer-facing partner portal enabling hospitals & surgery centres to schedule cases 24/7 with real-time confirmation.
- Architected 40+ NgRx feature slices, Signal-first standalone components, SignalR real-time notifications, domain-driven API layer, dark mode, and i18n — all under strict TypeScript 5 with zero NgModules.

CaiDrive

WebMobril Technologies · Luxury Car Rental · UAE

- Premium luxury & hypercar rental platform for Dubai — 500+ vehicles across 50+ brands (Ferrari, Lamborghini, Rolls-Royce, Bugatti, Pagani), rated 4.9/5 by thousands of customers.
- Built ₹K global vehicle search, brand filtering, per-vehicle spec & review pages, OAuth 2.0 SSO (Google & Apple), booking/reservation management, secure payment integration, and admin dashboard.
- Implemented Partner Locations lifestyle membership module (luxury hotels, restaurants, attractions & fuel with member discounts) and a chauffeur Rides module.

Health Safe Today

Benchwork Technologies · Digital Health · India

- Developed and maintained RESTful APIs and database layer for a mobile-first digital health wallet enabling Indian patients to store and access all health records on their phones.
- Integrated the platform with healthcare providers, labs, and pharmacies into a single interoperable ecosystem, improving care coordination and digitising health records at scale across India.

Kamrad Finder

WebMobril Technologies · Travel Matching · Global

- Travel companion matching platform solving friend/family bail-outs: subscribers are algorithmically matched with committed travelers heading to the same destination (Standard \$30 / Premium \$125 plans).
- Built 3-step matching flow (plan → destination search → account notification on match), curated global destination catalogue, and user privacy controls over connection acceptance.

Local Deals Fundraising

WebMobril Technologies · Fundraising Platform

- Digital fundraising platform replacing door-to-door sales for schools, sports teams, and clubs — organisations launch in a 20-min meeting; supporters buy the Local Deals App (90+ local merchant offers) or donate directly.
- Built live campaign tracking dashboard (leader & seller views), individual branded seller pages with one-click social sharing, single-use coupon redemption system, merchant business portal with Google Maps pinning and push notifications, and a yearly renewal/database growth engine.

Nikshala

Benchwork Technologies · EdTech · Study Abroad

- One-stop study-abroad guidance platform for Indian students targeting Germany, Australia & beyond — step-by-step admission & visa roadmap, personalised university shortlisting, SOP guides, expert courses (German language, TestAS), and progress tracking.
- Integrated Guruji — an AI-powered chatbot providing 24/7 instant guidance on the website, removing the dependency on live consultant availability; also published as an Android app on the Google Play Store.

MARBLELIFE® Franchise Portal

Taazaa Inc · Franchise Operations · USA

- Sole frontend engineer for an internal operations SPA serving the MARBLELIFE® nationwide franchise network (est. 1988) — stone, tile & surface restoration specialists across the US.
- Built on Angular 18 (standalone, Signals-only, zero NgRx/BehaviorSubject) with Nx 19 monorepo — centralises bulk ZIP photo uploads, before/after image curation for the public marketing site, CRM data, payroll reporting, and role-gated analytics.
- Architected 7 role levels (Super Admin → Technician), 6 panel types, 18 shared components, and a publishable Nx drag-and-drop library (`@marble-life-v1/drag-drop`) with Storybook coverage; deployed via Docker multi-stage build to nginx.
